UNIT SELF-TEST
QUESTIONS

- 1) Graph $y = 2^x$
- 2) Compare growth and decay from a graph
- 3) Be able to identify types functions as linear, quadratic and exponential
- 4) Determine model best describes the data from the given data;
 $\{(1, 3), (2, 9), (3, 27), (4, 81), (5, 243)\}$
- ⑦ 5) Write a recursive and explicit rule for a geometric sequence.
