Routines that can be
used during this Unit:

Cue Do Review Quick Reference Guide

Cue

1. Name the Routine
2. Explain how the routine will help students learn
3. Explain to students how they should participate

Do

4. Implement the linking steps
5. Ask students probing questions in order to co-construct the device
6. Provide positive and corrective feedback if necessary

Review

7. Ask questions about the critical content on device
8. Ask questions about the learning process and how the device works
9. Model how to use the device as a study tool, guide for doing other work

⑦	Two planets in the solar system, Planet A and Planet B, each have about the same mass. Planet A is five times farther from the Sun than Planet B. According to Newton's law of gravitation ($F = G(m_1m_2)/r^2$), how many times stronger is the gravitational force of the Sun on Planet B than it is on Planet A? How does the gravitational force change as two objects move farther apart? Why do astronauts seem weightless in orbit?
