

PANEL ON READING 7/20/05

(Work being done by committee led by Spriggs & Woodruff and including Gail Cheever, Peggy Reyes, Luanne Todd, Ginger Williams, & MANY other contributors)

GOALS:

1. To produce a document that would be easier to use & more appealing to secondary teachers who are in the position of teaching a "reading class" with larger numbers of students. (These teachers may or may not be faced with also including their state standards within the context of this class.)
2. To produce a document which can be used with general education content teachers within the context of the Content Literacy Continuum Level II – Embedded Strategies. This manual will include the reading strategies as well as activities and eventually model lessons that teachers can use when embedding the reading strategies within their general education courses.

Draft is done!
