### Cause-and-Effect Guide

**1** Restated question:  
What causes farmers in South America to slash and burn the tropical rain forest, and what is the effect of that practice?

**2** Key Terms:  
*Tropical rain forest*: dense forest, usually in hot, rainy area  
*Habitat*: natural home

**4** Causes & Connections:

People need land for growing crops and raising cattle.

Leading to →

**3** Event & Background Information:

#### Slashing and burning the tropical rain forest

Forest trees are cut down (slashed)

Remaining forest foliage is burned

Ashes provide short-term nutrients for growing crops and grazing cattle

Resulting in

**5** Effects & Connections:

Plowing and grazing cause soil erosion

↓  
Land quickly loses all nutrients; plants and grass won't grow

↓  
Land is abandoned, and new land has to be slashed and burned for growing more crops and grazing cattle

↓  
Unique habitat for plants and animals is lost

**6** Answer:  
Farmers in South America slash and burn the tropical rain forest to obtain land for farming and cattle grazing. The land quickly becomes unusable, creating the need for slashing and burning more land. The practice destroys the habitat of many plants and animals.

|---|---|
| <p>1 What is the <b>Claim</b>, including any <b>Qualifiers</b>? Are there qualifiers? <b>Yes/No</b>. (If yes, underline them.)</p> <p>Drinking more than 3 colas a day may weaken bones in women.</p>   |   |
| <p>2 What <b>Evidence</b> is presented?<br/>                 In column 3, identify the type of evidence with the letter: <b>Data (D), Fact (F), Opinion (O), Theory (T)</b>.</p> <p>For women or girls who drank 3 or more colas a day:<br/>                 Harvard study with 2,400 high school girls found less bone in those who drank over 3 sodas a day. <b>D</b><br/>                 Another study of 2,500 women found the same. <b>D</b><br/>                 Tufts Univ. study found 3% less density for women. <b>D</b><br/>                 Phosphoric acid in colas interferes with ability to use calcium to build bones. <b>T</b></p> | <p>3 What chain of <b>reasoning (warrant)</b> connects the evidence to the claim? In column 6, identify type of reasoning with the letter(s): for <b>AUTHORITY (A), THEORY (T)</b>, or type of <b>LOGIC: Analogy (AN), Correlation (C), Cause-Effect (CE), Generalization (G)</b>.</p> <p>Studies conducted by reputable institutions found that drinking 3 or more sodas a day caused women to have less bone density than those who didn't. <b>A</b><br/>                 This cause-and-effect relationship is supported by the theory that phosphoric acid weakens bones. <b>CE</b></p> |
| <p>4 Evaluate the quality of the evidence as poor, average or good. <b>Explain</b> your evaluation.</p> <p>Reliable Good – there were different studies.<br/>                 Valid Good – they studied women and drew conclusions<br/>                 Objective (no bias) Good – reputable institutions<br/>                 Methodology Good – many subjects</p>   | <p>7 Evaluate the quality of the chain of reasoning as poor, average or good. <b>Explain</b> your evaluation.</p> <p>Strength of Authority Good – reputable Institutions<br/>                 Application of Theory Good – accepted theory<br/>                 Type of Logic Good – cause and effect logic</p>   |
| <p>8 What are your concerns about the believability of the claim? (your counterarguments, rebuttals or new questions?)</p> <p>The claim seems believable, but I would like more studies with men.</p>   |   |
| <p>9 Accept, reject, or withhold judgment about the claim. <b>Explain</b> your decision.</p> <p>I accept the claim because good studies by reputable institutions found a cause-and-effect relationship between drinking soda and bone loss in women.</p>   |   |
