Integrating & Generalizing Learning Strategies
Florida SIM Update 2022

SIM Strategic Instruction Model
KU Center for Research on Learning
The University of Kansas
FDLRS Florida Diagnostic & Learning Resources System

Questions to Ponder

- How can I teach students to apply the strategies they have learned to content area assignments, standardized tests and real life situations?

- How can I incorporate Integration & Generalization of strategies into the work I do with teachers?

Reflect & Share strategies you use when you……

Exploring Prompts
Handouts, pgs. 2- 16

Practice with novels, articles, textbooks

- Group- Teacher led
- Group- Literature Circles
- Pairs
- Independent

Provide feedback, students give each other feedback

Use Prompts and Feedback Checklists

Generalization Assignments

Provide feedback, set goals

Guided Reading: novels, articles, textbooks….

Use Prompts: teacher leads at first, then gradually hands over to students

Model with Standardized Test Samples or Content Area Assignments

Use Prompts as you guide students through the stages of modeling

Preparing the Activity

Analyze the text for difficulty.

What strategies would I use to complete the activity?

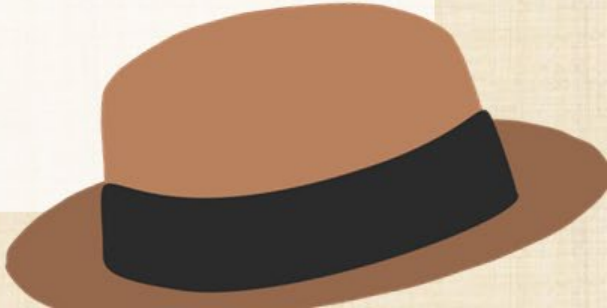
What strategies have I taught my students? What do they know?

How will I tackle vocabulary?

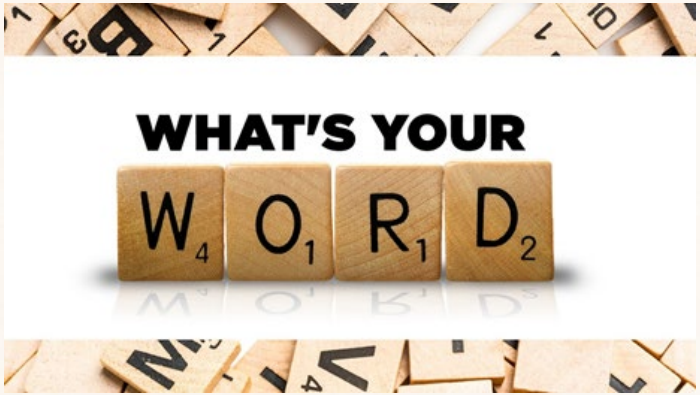
Which prompts should I choose?

Do I have a goal in mind for my students/ myself?

Sample in Handouts: pgs. 14-26



Breakout Rooms:

- Brainstorm ideas for PD or classroom instruction
- Choose 1 person from your group to share one idea or more


In closing, a word or a phrase that reflects how I feel about moving forward with teaching or providing professional development for teachers in integrating and generalizing strategies……..
